### BACKGROUND OF THE INVENTION

#### Field of the Invention

The present invention relates generally to computers and, more particularly, to computer-implemented systems for providing insurance quote information.

#### 20 Description of the Related Art

Computer systems are routinely used to generate insurance quotes based on information provided by the insured. The information that is provided by the insured varies depending on both the subject of the insurance policy to be underwritten and the type of coverage desired. For instance, in the case of automobile insurance the information provided by the insured includes information about the vehicle or vehicles to be covered under the policy, the driver or drivers to be covered under the policy, and the type of coverage requested by the insured.
